Sample SBI3U Evolution Unit Test Questions and Answers

Sample Multiple Choice Question

Question: Which process introduces new genetic variation into a population?

- A) Natural selection
- B) Mutation
- C) Genetic drift
- D) Gene flow

Answer: B) Mutation

Sample Short Answer Question

Question: Describe how the concept of natural selection can lead to the development of antibiotic resistance in bacteria.

Answer: Natural selection occurs when bacteria are exposed to antibiotics; most bacteria are killed, but some may have genetic mutations that confer resistance. These resistant bacteria survive and reproduce, passing on the resistance genes. Over time, the population of bacteria becomes predominantly resistant, leading to antibiotic-resistant strains.

Sample Diagram Question
