Objective: Reinforce solving multistep equations and practicing algebraic operations.

Materials Needed:

- Clues written on index cards
- Small prizes or certificates
- Algebra problem sheets

Activity Overview:

Students are divided into small groups and given the first clue, which leads them to the next station after solving an algebraic problem (e.g., solving for x). Each station has a problem that students must solve to get the next clue. The activity promotes teamwork and reinforces problem-solving skills.

Implementation Tips:

- Design clues that gradually increase in difficulty.
