A marina is a specially designed harbor with moorings and facilities to accommodate boats and yachts. Unlike a basic boat dock or harbor, a marina offers additional amenities such as fueling stations, maintenance services, storage, and recreational facilities. It functions as a nexus for boating enthusiasts, commercial vessels, and sometimes even residential communities.

Historical Development of Marinas

The concept of marinas dates back centuries, with early examples found in ancient civilizations like the Egyptians and Greeks, who established protected harbor areas for their vessels. However, the modern marina, as we understand it today, began to take shape in the 20th century, paralleling the rise of leisure boating and yachting culture.

The post-World War II economic boom saw increased disposable income and leisure pursuits,

prompting the development of dedicated waterfront facilities. Coastal regions worldwide began investing in marinas not only for practical maritime operations but also as centers for tourism and real estate development.
