- Flow Meters: ANSI standards address turbine, electromagnetic, and ultrasonic flow meters, ensuring consistency in measurement.

2. Control and Safety Instruments

Devices that regulate process variables or initiate safety actions.

- Control Valves: ANSI/ISA-75.01.01 standardizes control valve specifications.
- Safety Shutoff Valves: ANSI/ISA-77.40.01 specifies design and testing for safety relief devices.
- Limit Switches and Pressure Switches: Standardized for reliable operation in safety applications.

3. Signal Transmission and Communication Devices

These include transmitters, receivers, and communication interfaces.

- 4-20mA Current Loops: ANSI standards specify wiring, testing, and noise immunity.
- HART Protocol: ANSI/ISA-50.02 addresses digital communication over analog signals.
- Fieldbus Standards: ANSI/ISA-100.11a covers wireless communication protocols.

4. Calibration and Testing Equipment
