Research Methods in Sociology in Pictures

Photographic Ethnography

Photographic ethnography involves capturing images within a social setting to analyze cultural practices and social interactions. This method allows researchers to:

- Document everyday life and rituals
- Identify spatial arrangements and material culture
- Generate visual narratives that complement written ethnographies

In the second edition, case studies demonstrate how photographers and sociologists have collaboratively used images to explore topics like urban poverty, community identity, and social change.

Photo-elicitation Interviews

Photo-elicitation combines visual stimuli with verbal interviews, encouraging participants to reflect on their experiences through images. This technique enhances data richness by enabling participants to:

- Express feelings and perceptions that are difficult to articulate
- Trigger memories and insights related to the images
- Engage in deeper discussions about social issues

The book provides guidance on ethical considerations, such as obtaining consent and respecting

participants' privacy when using images.

Visual Content Analysis

Content analysis of images involves systematically coding and interpreting visual material to identify patterns and themes. This method is useful for analyzing:

- Media representations of social groups
- Advertising and political imagery
